TVET ACADEMY AWARDS

THE BEST TEACHER TRAINEE AWARD is addressed to a teacher trainee with exceptional performance results in a related field; excellent performance in academic terms, attained outstanding performance and actively participated in any activity organized by the institution, in addition to having a passion for learning, and having strong leadership potential.

The objectives for the awarding of the best teacher trainees are;

- Acknowledge and promote teacher trainee academic excellence;
- Recognize and give appreciation to teacher trainees who have shown determination and commitment to succeed and excel in their overall achievement;
- Provide formal recognition of teacher trainee achievements which can be included in their curriculum vitae;
- Promote healthy competition among teacher trainees to achieve good academics as well as in the curriculum;
- Cultivate a culture of excellence in academics, co-curriculum, leadership skills and personality development of teacher trainees;
- Encourage the active participation of teacher trainees in academic activities to enhance creative and innovative thinking;
- Increase the visibility of teacher trainee excellence and motivate other teacher trainees to perform better thereby upgrading standards of excellence and achievement.

To be eligible for the award, a teacher trainee need to meet the following criteria:

- Successfully completed the programme
 - Determines excellent attitude and discipline, motivated and has never been subjected to any form of disciplinary action throughout his/her programme
 - Scores minimum GPA of 4.0 (for FTE programme) or CGPA of 4.0 (for DTE and CTE programme)
 - Achieves the Minimum Total Final Points scored of 80%
-
- 
- 

TVET ACADEMY BEST TEACHER TRAINEE AWARD 2021

SITI UMI AMIRAH BINTI HAJI RA'EMI MALEEK
Diploma in Technical Education

I have always believed that every student is different, and it takes passion to help them to learn genuinely which can make a difference in their lives and lead to great things in their future.

With my years of being in the education system, it has given me the opportunity to learn that teaching is not an easy job as it needs variety of skills to be able to do more than simply teach a subject matter. I would like to thank all my instructors and colleagues who I have been so grateful for leading me towards professionalism and my family for giving me their endless support. Without them, I would not be where I am and who I am today.

21385 SSGT NUR ATIQA H BINTI AWANG MAHANI
Foundation in Technical Education

"Teaching is not only about educating people, but most importantly, it empowers our young generation & the knowledge that they gained, travels with them far into the future" - Anonymous

I believe that learning is a life-long process. People can't just stop learning. It's impossible. Every day you learn new things in life. Be it big or even small things. That's why I love being in a learning environment. I love sharing and exchanging knowledge and information. That's why I am passionate about teaching. I believe that teaching is not only about relaying knowledge and information, but also another way to serve my country, community as well as our young generation.

THE IBTE AWARDS

IBTE BEST STUDENT AWARD

The IBTE Best Student Award is awarded to an individual student who has distinguished themselves both academically and in their outstanding involvement in extra curricular / co-curricular activities.

The award recognizes and reward students who have shown commitment and determination to succeed and excel in their overall achievement. It encourage students active participation in academic activities to enhance creative thinking and innovativeness. This also implements a culture of excellence in academic, extra-curricular / co-curricular, leadership skills and personality development of students. It is hoped that this promotes healthy competition among IBTE students to acquire both academic and co-curricular achievements.

Students at all programme levels are eligible for nomination for the IBTE Best Student Award. The two network of schools, IBTE Central and IBTE Satellite, will nominate ONE best student who has met all the criteria for the BEST Student Award for each level of qualification in each programme cluster at any one time. These nominations will be made through the IBTE Central and IBTE Satellite Academic Board respectively, to the IBTE Academic Council Secretariat.

IBTE STUDENT SPECIAL AWARD

IBTE Student Special Award was originally created in 2014 as recognition to students who have demonstrated outstanding performance and participation in extracurricular activities, leadership in school and academic achievement. This award is aimed to promote students leadership skills and development and enriching the lives of students and the school.

The Special Award recipients will exemplify the qualities of leadership excellence and consequently will motivate other students to attain a high level of achievement in all aspects in technical education.

The objectives of the award are to recognize and appreciate students who have outstanding involvement in co-curricular activities, to promote healthy competition among students to improve in academic and co-curricular activities, to implement a culture of excellence in the accomplishment of academic, co-curricular, leadership skills and personality of students, and to act as a catalyst to motivate other students to do the same.

The recipient of IBTE Best Student Award and IBTE Student Special Award will be announced and awarded at the convocation ceremony.

NTec in Information Technology

FINDING THE PASSION:

Motivation & Inspiration from IBTE Best Students of 2021

‘One Small Positive Thought Can Change Your Whole Day.’

I wanted to try something new outside of my comfort zone and came across the Agrotechnology course and it peaked my interest on high-tech farming. His Majesty has called on for more efforts to strengthen self-sufficiency and survival via the agricultural sector. From there I dreamt that one day I'd open a business on hydroponic farming because I want to be a part of the change in the Agriculture industries in Brunei Darussalam. My curiosity and hunger for new knowledge which I can then teach to other people what I learned kept me motivated during my studies.

Don't give up on your passions. If you are really in love with what you do, you shouldn't care what other people think of you. The search for knowledge will be bumpy and rough, and there is no need to be embarrassed or ashamed of the dream you're chasing.

MUHAMMAD NAJWAN BIN ANUAR
HNTec in Agrotechnology (Specialised in Crop Production)

Think hard the kind of future you want to create for yourself. I chose this programme because it has a better job opportunity, a stable career and long term development opportunities. I kept focused and maximized on every opportunity, knowledge and skills that was taught during my studies as I create a better future for myself.

ROYAFFINDY ANAK WAHID
Diploma in Refinery Operator (Level 5)

It has always been my dream to work in the oil and gas industry. It would be a dream come true to work for one of Brunei's major companies such as BSP, BLNG, BFI. I heard about ICE from a close friend and decided to take it because it looked like a lot of fun and is mostly hands-on. I didn't regret taking this programme because it has fundamental for other engineering programmes I could pursue in the future. Lastly, as a woman, I would like to break the gender stereotype in the workplace that engineers are just for men.

NURNADIA BINTI ALI
HNTec in Instrumentation and Control Engineering

To be a qualified technician, we must have basic telecommunication skills. My officers have put their trust on me to further my studies. I researched the programme beforehand and found it quite interesting.

Alhamdulillah, a big thank you to my officer for giving me this rare opportunity to further my studies which I grabbed and proved that I can do well. I am blessed, Allah has given me family and good friends who encouraged and supported me and always has my back throughout this journey.

To the current and future students of IBTE, never give up and trust yourself. Always ask your instructors for help when you have difficulties with some module/topics, help your coursemates when they have problems with their studies, having a study group is really helpful.

21934 SLD NURMAIZAN IZZATI AFRINA BINTI MEZLAN
HNTec in Telecommunication Systems

I didn't know what I wanted to do, and chose Geomatics because it was different, in the end this programme aligned with my career goals and a high probability of job offers in the future.

I reminded myself the reasons why I started this journey with every challenges I faced. With every new knowledge and skills acquired it kept me motivated during my studies. I am thankful for the teamwork from my fellow coursemates, we worked through our differences and challenges as we worked through our group assignments. I always kept a positive mindset, and had faith that everything will run smoothly as planned.

To new and current IBTE students, always believe in what you are trying to achieve in fulfilling your dreams. Never give up on pursuing your studies because the more you learn, the better life and perhaps job you will get in the future.

NUR HUWAIDA RAFI'AH BINTI AWANG HAMDANI
HNTec in Geomatics

This was a platform for me to sharpen and expand my skills that is related to the business world. From what I've been through as an IBTE student, we need to be mentally and physically prepared to take on anything this programme give. A tip I would like to share is to manage your time well, don't procrastinate and always ask if you don't understand. We don't know what our challenges are going to be in the future, we just have to be prepared, there is no need to stress out, enjoy this opportunity you get to have at the end of the day.

DANIA JUZAILA BINTI JOHARI
HNTec in Office Administration

FINDING THE PASSION:

Motivation & Inspiration from IBTE Best Students of 2021

My passion and interest in food sparked since I was little as my mother taught me how to cook, and the memories of watching cooking shows with my late father. Seeing people looking happy when eating delicious food and enjoying their time from the hospitality they received, it makes me feel satisfied. During my work attachment, I got to experience and learn new skills from the different departments in the hospitality industry, it motivated and inspired me to keep gaining and learning new knowledge and skills. When I look back, I could see how far I have come from when the first time I entered as a student.

Remember that you are always learning something new in life. Don't be afraid to try out new things, let your imagination and creativity out! For anyone out there who doesn't feel confident enough, do what you can until you reach your limit and sometimes, you'll find yourself with a talent that you don't know you have. Don't let others define the world for you and show them what you are capable of, stay focused on what you want to achieve and go for it!

DYG NUR AFIQAH BINTI AWANG HAJI SUHAIMI
HNTec in Hospitality Operations

"If you want to learn something, read about it.
If you want to understand something, write about it.
If you want to master something, teach it."
~Yogi Bhajan.

This quote has helped me with my studies that if I want to master what I'm learning, I take the opportunity to teach my friends that are struggling with their studies. My drive to compete with my coursemates, helped me push myself in my studies. I do not want to be left behind, I must work hard. The outdoor learning, my curiosity on crop and livestock production, seeing the crops I planted grow, has been very satisfying for me and I can see my future in this agriculture industry.

MUHAMMAD ALIMIN BIN HAJI MAHLI
NTec in Crop and Livestock Production

"It Is A Slow Process, But Quitting Won't Speed It Up"

I want to say thank you to all my instructors and BNA34 family, how we supported each other when we have difficulties with our assignments and practicals. Thank you for the positive learning environment that helped motivate me to keep doing my best. Stay positive, study smart, do not be afraid to try something new and avoid people who bring you down.

MOHAMMAD ADI PUTRA BIN ABDULLAH MOHAMMAD SHAH
NTec in Business and Administration

I am grateful for my instructor who always supported me throughout the programme. She gave me the mindset of 'I can do this'. I would not be here today if it wasn't for her. I learned to accept me for who I am and not to compare myself to others. Get out of your comfort zone for you never know what new skills you can gain.

NURUL FATIN SYAHIRAH BINTI AZEMI
NTec in Building Craft

Don't get too comfortable because when you get too comfortable, you start to get lazy and no drive to go further. Go and get knowledge because that will be your biggest passport to go anywhere. Gain experience and be brave enough to try something new.

At first I wanted to be a lawyer, but the part time job at a local restaurant sparked my interest for cooking and love of food and I just wanted to learn more about it. I realised my parents were a big influence in my life when it came to cooking and food, as my father used to run his own food stall and wonderful memories of my mother with her dishes.

MUHAMMAD ABDUL QAIYUM BIN HAJI RABAE
NTec Apprenticeship in Professional Cookery and Services

From game developer, to music, to editing videos, to production works, there is so much you can do in this IT industry!

If you feel lost on a subject, please try to search the information on the internet. Having extra knowledge from different sources can be quite beneficial.

SEIZE THE OPPORTUNITY:

Motivation & Inspiration from IBTE Student Special Awards 2021 Recipients

Get your goals and game plan on the line. Remember the pressure that was put on you during your study for years and take that as your strength throughout your learning phase. Big decisions can be scary, but that is why you always need multiple plans. However, some plans cannot be (successfully) executed as one man or one woman shows – that is when networking comes into play. Utilize your lecturer as part of your networks, especially if they teach classes important to your major. Network with people in your major, in different organizations and those who work on campus. These relationships are valuable as you will be able to benefit from one another by learning from each other.

The huge part of surviving college years is keeping your mental state in check. Most likely you will try to take a lot in your junior year – sometimes more than what you can handle. Be honest with yourself about what you can and cannot do. Everyone is different, and everyone has a different journey, your time to cross the finish line will come – no need to compare yourself. The most important thing is to have a good rest once in a while, but don't quit. Find activities to reduce your stress levels and clear up your mind – enjoy the little things.

**AMAL NURSYAFIQAH @ AMAL NURASYIKIN BINTI
HAJI JEFFRI**
HNTEC in Agrotechnology
(Specialised in Crop Production)

I was inspired by my father who is an architect and this programme taught me from the basics. I know it will take a long time to achieve the goals, but it is not impossible for me if I try my best.

My family and best friend believed in me that I can do this and supported me throughout my studies. I wanted to prove to myself and to others that had looked down on me that I can be a successful person.

For the current and future juniors of IBTE, I wish you guys the best of luck. Remember to believe in yourself that you can do this. Enjoy the process and don't stress yourself too much, no matter how hard and tiring all of this gonna be, it will pay off. Set your goals and always think positive.

NURUL ASYIQIN BINTI MATARSAD
NTec in Building Craft

Choose your path wisely, your interests are an important part of picking a major. If you are not motivated and dislike what you are studying, you won't be particularly motivated to complete your coursework. It is essential you are interested in what you are studying. You should be able to envision yourself using at least some of the skills you are learning in your major in the workforce.

I had set a goal for myself and this goal had motivated me to finish this course to meet that goal. Finding self-motivation requires long-term commitment, courage, and perseverance. I always try to find ways to give myself a boost when I needed it and never giving up when I hit a dip. Doing something for your own sake and purposes is more fulfilling and enjoyable. :)

I choose mechanical engineering as my path and found a lot of interesting modules such as 'Mechanical Rotating' and 'Industrial Services' were just some of the skills you learn in Mechanical Engineering. These skills are transferable, meaning the skills I attained will be useful for working in the oil and gas industries and further help develop my skills to become more employable.

NOOR ZURIAH BINTI MOHAMMAD RAPI
HNTEC in Mechanical Engineering

It was a dream come true. I always dreamed of opening a workshop that is high-tech and affordable. I wanted to be a mechanic since I was young and be part of the Automotive industry.

I am grateful for all the people in my life, my family, all the friends I made in IBTE. I would specifically like to thank Cikgu Ali Yusri whose words of motivation stuck with me "why do you care of what people say about you, at the end its you and yourself", my Group Leader Miss Siti Noramizan, Miss Dr Raimie Head of School of Energy Engineering Central, all the instructors and Technical Assistants that were at IBTE Mechanical Campus, I am forever grateful for your guidance.

To fellow students and future students of IBTE, never give up to make your dreams come true. No one can stop you but yourself, don't be the reason why you are not achieving your dreams. Push yourself like there is no limit.

**MUHAMMAD 'AFIF MU'IZZADDIN
BIN SHAHRUL- ANUAR**
HNTEC in Automobile Technology

SEIZE THE OPPORTUNITY:

Motivation & Inspiration from IBTE Student Special Awards 2021 Recipients

I enjoy cooking, trying out new recipes and wanted to learn the proper techniques of food preparation professionally. I like the challenges throughout this whole course as it has made me more competent in completing my tasks and assignments. Always be thankful, receive constructive criticisms while doing tasks and assignments with an open mind to further improve ourselves.

HENNY RENA BINTI ABDULLAH GARISU
@ HENNY RENA BINTI GARISU
NTec in Culinary Operations

I chose this programme as it open doors to various career paths, a gateway to the business community. What motivated me most & what kept me from giving up was myself. Prior to IBTE, I've experience failures & disappointments, I have felt what it was like to be rock-bottom. When I got accepted, it was a wake-up call, a chance to start over, to be better and prove to myself that I can do well. The feeling of knowing you've worked hard, tried your best and getting the results became an addiction. The academic validation that came with getting good grades felt exhilarating. I strived to improve and do better. Even when experiencing setbacks, as long as I tried and did my best, that alone was enough.

My advice to current and future students of IBTE, is to always take that opportunity. Don't push away the chance to make memories and experiences. These will be the days that you look back on and reminisce. Collect as many happy moments as you can because in a blink of an eye, moments will become memories. 2 years is both long and short. Make the most of it. Stop limiting yourself & grab every opportunity that comes your way. Prioritize your mental health & wellbeing. Take breaks when necessary. Don't skip meals. That assignment won't go anywhere. Take care of yourself and good luck. I believe in you.

NUR HUSNINA BINTI HAJI YAHYA
HNTec in Office Administration
